Entomology

Project units 1-4 are designed for members 8-18 years old and build upon each other.

Unit 1-4 - Learn About Insects

Inspiring youth to:

- Study the life history of an insect
- Make an insect collection of eventually 200 insects
- Pin, label, and exhibit your insect collection
- Learn about different scientific insect orders
- Learn how to classify insects
- Learn about beneficial and destructive insects
- Make an insect survey about your home and neighborhood
- Study an insect in depth and make a report
- Map the insect situation
- Construct and operate a light trap

Resources:

- Exhibit & Judging Requirements
- Record Books
- Manual Information

Located at: Colorado4h.org

Project units 5-6 are designed for members 8-18 years old who are interested in insect development.

Unit 5-6 - Life Stages

Inspiring youth to:

- Make a collection of larvae and immature insects
- Rear an insect from the egg stage
- Assume responsibility for an insect control program
- Develop special insect collections
- Provide leadership to younger members

Project unit 7 is designed for older members who have completed all other units

Unit 7 - Exploring with Insects

Inspiring youth to:

- Develop your own plan for a study and experiments
- Seek out new resources
